Food Safety Handbook Deep trade agreements (DTAs) cover not just trade but additional policy areas, such as international flows of investment and labor and the protection of intellectual property rights and the environment. Their goal is integration beyond trade or deep integration. These agreements matter for economic development. Their rules influence how countries (and hence, the people and firms that live and operate within them) transact, invest, work, and, ultimately, develop. Trade and investment regimes determine the extent of economic integration, competition rules affect economic efficiency, intellectual property rights matter for innovation, and environmental and labor rules contribute to environmental and social outcomes. This Handbook provides the tools and data needed to analyze these new dimensions of integration and to assess the content and consequences of DTAs. The Handbook and the accompanying database are the result of collaboration between experts in different policy areas from academia and other international organizations, including the International Trade Centre (ITC), Organisation for Economic Co-operation and Development (OECD), United Nations Conference on Trade and Development (UNCTAD), and World Trade Organization (WTO).

Corporate Compliance Answer Book Export control laws and regulations are the legal framework for countries around the globe to ensure world peace and stability and their importance in international trade is growing. The reasons behind this growth lie in the evolution of technology, the fact that increasing amounts of goods/services are subject to controls (such goods/services representing a very large segment of world trade), and in the increasing threat linked to terrorism. Consequently, export control laws and regulations have become extremely important for those involved in the international trade of goods/services with a direct - or even indirect - military use. Export control laws and regulations are complex, difficult to understand, and constantly evolving. Infringements can lead to very serious sanctions (civil, administrative, or criminal) and, to not to be minimized, the risk of serious damage to the corporate image of one or more parties to a questionable transaction. Yann Aubin and Arnaud Iardi are experienced professionals confronted to export control issues on a day-to-day basis in their respective capacities as lawyer and export compliance officer within two large multinational companies. They have gathered contributions from export practitioners (EADS and Thales as well as Hogan Lovells) and university scholars (Paris 11 Law School/Institute of Space and Telecommunications Law (IDEST) faculty and advanced students) to make the Export Control Handbook as useful as possible. The Export Control Handbook provides a practical examination of the export/import control regimes of defence and dual use goods and services of a number of selected jurisdictions around the world (China, European Union, France, Germany, India, Italy, Japan, Russian Federation, Spain, United Kingdom, United States). The Handbook contains a very useful appendix including, among other things, compliance procedures and standard country-specific application (or related) forms. The aim of each country-specific chapter of the Handbook is to provide actionable information designed to guide importers or exporters of military or dual-use products in such jurisdiction. The Export Control Handbook is invaluable to any international trade professional (lawyer, compliance officer, procurement officer, etc.) or entity with a need to know the specific requirements to be followed in the jurisdiction in question for the efficient - and legally compliant - import or export of controlled military or dual-use goods or services.
