This new guide includes more than 1,200 questions previously published in NeoReviews from January 2007 to December 2017. Each question is followed by a short explanation of the correct answer with references, including the original article. Chapters include Cardiology|Dermatology|Endocrinology|ENT and Ophthalmology Fluids, Electrolytes, Nutrition Gastrointestinal Genetics and Inborn Errors of Metabolism|Hematology/Oncology|Immunology Infectious Diseases|Maternal-Fetal Medicine|Neonatal Resuscitation|Neurology|Renal Respiratory Statistics, Research, Health Services, and Ethics|While there are a growing number of books based on the Toyota Production System, or lean, focused on healthcare, there are very few that detail the tools that make lean more than just a way of thinking and put the methodology into practice. Based on Hiroyuki Hirano's classic 5 Pillars of the Visual Workplace and modeled after the Shingo Prize-winning Shopfloor Series for Lean Manufacturers, 55 for Healthcare adopts a user-friendly format to impart all the information needed to understand and implement this essential lean methodology. It provides examples and case studies based on the experiences of the principals involved with the Rona Consulting Group, who were responsible for the groundbreaking implementation of the Toyota Production System at the Virginia Mason Medical Center. Written to readily assist with hands-on implementation efforts, this volume offers innovative features designed to improve understanding and support application. This includes helpful how-to-steps and practical examples taken directly from the healthcare industry.|Textbook of Neonatal Resuscitation (NRP) 7th Edition 2016|The Neonatal Resuscitation Program (NRP) is an educational program jointly sponsored by the American Academy of Pediatrics (AAP) and the American Heart Association (AHA). The course is designed to teach an evidence-based approach to resuscitation of the newborn to hospital staff who care for newborns at the time of delivery. New in the 7th edition!|Text updated to reflect the 2015 AAP/AHA Guidelines for Cardiopulmonary Resuscitation and Emergency Cardiovascular Care of the Neonate|Two new chapters added covering post-resuscitation care and preparing for resuscitation|140 new full-color photographs replacing most line drawings|This 2-volume "bible" of neonatology has been exhaustively updated to reflect all of the sweeping developments that have recently occurred in neonatal-perinatal medicine. There is an enhanced focus on evidence-based medicine, and all the material incorporated has been taken from the most recent clinical trials. With a stronger, and 25% brand new author team, this book is set to provide you with full and relevant coverage of all the issues facing neonatal-perinatal medicine to date. Examines new non-invasive monitoring systems such as transcutaneous glucose monitoring, infrared blood flow monitoring, magnetic resonance spectroscopy, new MR brain imaging techniques, and near-infrared spectroscopy and optical imaging. Incorporates brand-new material on the history of neonatology/medical and surgical treatment of the fetus and practicing evidence-based neonatal/perinatal medicine. Contains new material on high-frequency ventilation and cutting-edge guidelines for managing a micropremie. Explores how recent advances in genetics have expanded the options for testing and treating various disorders. Offers added coverage on the management of neonatal ventilation. Features a new chapter stressing collaboration between neonatologists, perinatologists, and obstetricians. Delivers an enhanced focus on evidence-based medicine. Presents increased information on databases used for the evaluation of outcomes in neonatal medicine. Provides all-new references to reflect the most recent sources in the literature|New and updated case studies and numerous brand-new illustrations and tables.|Obtain evidence-based information to make timely and accurate diagnoses and treatment decisions. Continuing with this volume, Succint Pediatrics is an ongoing series covering the entire scope of pediatric medicine. Each volume includes concise chapters with key features and invaluable tables and algorithms—resources health care professionals can use to deliver the highest quality of care. This third volume features 41 topics with key points and detailed therapies in neonatology, genetics, neurology, and developmental and behavioral disorders. Evidence-based levels of decision support are also provided throughout the book to provide insight into diagnostic tests and treatment modalities. Topics include Apnea of Prematurity|Birth Injuries|Respiratory Distress Syndrome|Down Syndrome|Turner Syndrome|Ataxia and Movement Disorders
Cerebral Palsy, Febrile Seizures, Hydrocephalus, Autism Spectrum Disorders, Behavior Patterns, and more.

Before the 1st edition of the Textbook of Pediatric Emergency Medicine published, there was no official pediatric emergency medicine subspecialty in either pediatrics or emergency medicine. This book defined many of the treatments, testing modalities, procedural techniques and approaches to care for the ill and injured child. As such, it was written with both the pediatrician and the emergency physician in mind. The Textbook of Pediatric Emergency Medicine, has an entirely new editorial board and templated chapters focusing on evidence-based diagnosis and management of pediatric patients in the ED. The book’s content has been rewritten to eliminate and eliminate redundancy, creating succinct sections that pertain to patient care in the ED. Templated chapters include: Clinical Outcomes/Goals of Therapy, Current Evidence, Clinical Considerations, Clinical Recognition: Triage, Initial Assessment, Management, Diagnostics, Testing, Clinical Indications and Management, Discharge and Instructions. In the ED, nurses and physicians work closely as a paired team, thus this edition reflects that partnership and offers content tailored to it. Online ancillaries, found in the bundled eBook, include Learning Links for nursing considerations and clinical pathways that outline the key steps to take when managing critically ill patients.

THE FIELD’S MOST TRUSTED AND COMPREHENSIVE POCKET GUIDE TO TREATING COMMON AND RARE PROBLEMS IN NEWBORNSS—EXPANDED AND UPDATED: A copy of this reference should be kept readily available in the newborn unit. It is a potent learning tool for NCU students. — Family Medicine review of an earlier edition. A true essential for twenty-five years, this streamlined pocket reference provides logically organized, quickly retrievable information on basic and advanced management techniques for the neonate. Featuring a convenient outline approach that puts key information at your fingertips, this quick reference covers everything you need to know about on-call neonatal problems, procedures, diseases and disorders, and pharmacology. FEATURES: New 7th Edition — editorial board; new chapters on therapeutic hypothermia, airway management, craniosynostosis, extracorporeal membrane oxygenation, transfusion, neonatal sepsis, gastrointestinal disorders, transient neonatal myasthenia gravis, pertussis, and tuberculosis — New Full-color images of neonatal rashes and dermatologic problems — New full-color images of neonatal imaging — Expanded coverage of neonatal resuscitation — 140+ new full-color photographs replacing most line drawings — The Atlas of Procedures in Neonatology, Fifth Edition, provides detailed, step-by-step instructions on procedures performed in the neonatal intensive care nursery. In an easy-to-follow outline format, with more than 450 drawings and clinical photographs, the book presents clear, current information on indications, preparation, technique, precautions, and how to avoid potential complications. New for this edition: New chapters covering: Brain and Whole Body Cooling; Bubble CPAP; Educational Principles of Simulation Based Procedure Training to help you stay updated on the latest technology and information Access to free online companion website that includes fully searchable text, image bank and videos so you can access the content anytime, anywhere Video collection has been expanded to include: lumbar puncture, intravenous infusion, bubble CPAP and pericardiocentesis for both commonly performed procedures and vital emergency procedures.

CD includes: full text plus dramatic footage of actual resuscitation events, laryngoscopic view of the airway, digitized animation, review questions, and learner-directed interactive video scenarios.

New 7th Edition! Powerful resource for interactive, simulation-based teaching and learning! The Neonatal Resuscitation Program (NRP) is an educational program jointly sponsored by the American Academy of Pediatrics (AAP) and the American Heart Association (AHA). The course is designed to teach an evidence-based approach to resuscitation of the newborn to hospital staff who care for newborns at the time of delivery. New in the 7th edition! Text updated to reflect the 2015 AAP/AHA Guidelines for Cardiopulmonary Resuscitation and Emergency Cardiovascular Care of the Neonate! Two new chapters added covering post-resuscitation care and preparing for resuscitation! 140+ new full-color photographs replacing most line drawings.
New 8th Edition! Innovative resource for interactive, simulation-based teaching and learning The Neonatal Resuscitation Program (NRP) is an educational program jointly sponsored by the American Academy of Pediatrics (AAP) and the American Nurses Association (ANA). The course is designed to teach an evidence-based approach to resuscitation of the newborn to health care professionals who care for newborns at the time of delivery. NRP Essentials and NRP Advanced The NRP, 8th edition, introduces a new educational methodology to better meet the needs of health care professionals who manage the newly born baby. New in the 8th edition Key Points at the beginning of each lesson. Quick Response (QR) codes that enable the reader to view short videos about the topics on their mobile device. Lesson Review Questions grouped together at the end of each lesson. Quality Improvement Opportunities and Frequently Asked Questions in each lesson. New sections in Lesson 10 (Special Considerations) about resuscitation of the newborn with a myelomeningocele or an abdominal wall defect. Three Supplemental Lessons (Improving Resuscitation Team Performance, Resuscitation Outside the Delivery Room, and Bringing Quality Improvement to Your Resuscitation Team) that allow NRP users to enhance their resuscitation knowledge and performance.

Known as the #1 bible of midwifery, this new edition of Varney's Midwifery has been extensively revised and updated to reflect the full scope of current midwifery practice in a balance of art and science, a blend of spirituality and evidence-based care, and a commitment to being with women.

The fourth edition contains guidelines on the development and evaluation of the health and safety of children in early care and education settings. This guide features 10 chapters of more than 650 standards and dozens of appendixes with valuable supplemental information, forms, and tools. KEY FEATURES More than 100 updated standards and appendixes Updated appendixes, including Signs and Symptoms Chart, Recommended Immunization Schedule, and Recommendations for Preventive Pediatric Health Care Completely revised and updated topics on environmental health, infectious diseases, and nutrition TOPICS INCLUDE Staffing Program activities for healthy development Health promotion and protection Nutrition and food service Facilities, supplies, equipment, environmental health, and playgrounds, and transmission Infectious diseases Children with special health care needs and disabilities Administration Licensing and community action And more

The 2003 Red Book, 26th Edition advances the Red Book's mission for the 21st century, with the most current information on clinical manifestations, etiology, epidemiology, diagnosis, and treatment of more than 200 childhood infectious diseases. Developed with the assistance and advice of hundreds of physician contributors from across the country, the new edition contains a host of significant revisions, updates, and additions to its authoritative content. Includes active and passive immunization, recommendations for care of children in special circumstances, summaries of infectious diseases, antimicrobial agents and related therapy, antimicrobial prophylaxis, and useful appendixes.

That package includes ISBN-10: 0133936724 / ISBN-13: 9780133936728 and ISBN-10: 0205909744 / ISBN-13: 9780205909742 . MyDevelopmentLab should only be purchased when required by an instructor. *"For courses in Child Development" *"Visit the Preview Website to see sample chapters, get information on the supplements (including sample videos and on-line simulations), and much more. Click here. A best-selling, chronologically organized child development text, Berk and Meyers' *"Infants and Children: Prenatal Through Middle Childhood" is relied on in classrooms worldwide for its clear, engaging writing style, exceptional multicultural and cross-cultural focus, rich examples, and long-standing commitment to presenting the most up-to-date scholarship while also offering students research-based, practical applications that they can relate to their personal and professional lives. The authors' decades of experience in the field make them a great team for coauthoring this new edition. Together, they present the latest theories and findings in the field to students in a manageable and relevant way. Berk and Meyers' signature story-like, conversational style invites students to actively learn about the field and the text's "characters," who experience real issues in development, including physical, cognitive, and peer challenges, as well as parenting and educational concerns. Berk and Meyers also help students connect their learning to their personal and professional areas of interest, speaking directly about issues students will face in their future pursuits as parents, educators, health care providers, social workers, and researchers. As members of a global and diverse human community, students are called on to intelligently approach the responsibility of understanding and responding to the needs and concerns of children. While carefully considering the complexities of child development, the authors present classic and emerging theories in an especially clear, engaging writing style, with a multitude of research-based, real-world, cross-cultural, and multicultural examples. Strengthening the connections among developmental domains and of theory and research with applications, this edition's extensive revision brings forth the most recent and relevant scholarship, representing the changing field of child development. *"Infants and Children: Prenatal Through Middle Childhood," Eighth Edition is also available via REVEL(TM), an immersive learning experience designed for the way today's students read, think, and learn. Learn more.

Product 15-2811

Significantly revised and updated by the American Academy of Pediatrics Committee on Nutrition with contributions from more than 100 authors, the new seventh edition provides more practicing clinicians with evidence-based guidance on the full spectrum of childhood nutrition issues. The new seventh edition provides the latest information about nutrient metabolism and nutrition to support the normal development and health of infants and children who are well, those born with congenital anomalies or disorders of metabolism, and those with acute and chronic illness. New in the 7th edition: - The latest evidence-based guidelines from the AAP on feeding healthy infants and children - Current policies and practice recommendations from the AAP Committee on Nutrition - Several new chapters and appendixes have been added, including chapters on school...
and day care nutrition; gene and nutrient interaction; and metabolic programming. - Recent advances and developments on topics that arise frequently in pediatric practice: breastfeeding, fast foods, vegetarian diets, persistent newborn diarrhea, preterm infant nutrition needs, chronic obesity, vitamin supplementation, and more - Appendices of more than 50 tables including dietary allowances, energy requirements, composition of human milk and infant formulas, MyPlate, and more - More than 20 growth charts for very low and low birth weights; full-term infants, children, and adolescents; down syndrome; and more - Updates listings of resources for you and your patients, including printed materials, government agencies, and Web sites

Time-saving, low-cost solutions for self-paced learning or instructor-led training! Developed for health care professionals who provide care to pregnant women and newborns, the Perinatal Continuing Education Program (PCEP) is a comprehensive, self-paced education program in four volumes. Completely updated and revised with learning-edge procedures and techniques, Book IV: Specialized Newborn Care, 3rd Edition features 6 units dealing with complex neonatal therapies, such as assisted ventilation, as well as a unit on continuing care for at-risk babies and those with special problems following intensive care. PCEP is a proven educational tool for Improving perinatal care knowledge, policies, practices and procedures Establishing organization-wide care goals and routines Teaching both practical skills and cognitive knowledge Saving time and money -- streamline the learning process Reducing care risks through consistent, comprehensive, evidence-based care practices main emphasis on the need to achieve wide consistency of knowledge and skills competency. Encouraging cooperation and communication among diverse staff Simplifying education planning and budgeting

From fundamental principles to advanced subspecialty procedures, this book covers the full scope of contemporary anesthesia practice in just two volumes. A who's who of internationally recognized authorities offers in-depth, state-of-the-art coverage of basic science and pharmacology, step-by-step instructions for patient management, and an in-depth analysis of ancillary responsibilities and problems. Video clips on the accompanying CD-ROM (45 minutes of full-motion video) depict many anesthesia techniques and the proper technique for new and difficult procedures.

From the files of "NeoReviews" comes this collection of Perinatal Profiles, chosen to provide a glimpse into the lives of the movers and shakers in neonatal/perinatal medicine Many of the profiles in this collection were written by the students of the pioneers who have gone on to become key NPM innovators themselves. They provide rare insight into the personalities of their mentors and the development of NPM. You will meet such luminaries as: Alex Minkowski, MD, whose life's work, including a conference on whether assisted ventilation did more harm than good, led French President Jacques Chirac in 2004 to call him one of the consciences of the 20th century. Martin Couney, MD, who in 1896 began 40 years of organizing preterm baby child hatchery sideshows to increase the marvels of incubator technology at expositions, state fairs, traveling circuses even Coney Island showing the public that even the most severely preterm infants had a chance for survival. Elizabeth Blackwell, Marie Putnam Jacobi, Elizabeth Garret, and Madeleine Bres, the first female physicians caring for women and children at the end of the 19th century. All struggled for admission to medical school yet eventually managed to pierce the armor of sex bias. Ignac Fulop Semmelweis, the Hungarian pioneer of antisepsis who first demonstrated that most childbed fever cases could be prevented one of the most important discoveries of 19th-century medicine yet was ridiculed and released in disgrace from his Viennese hospital and medical school faculty posts. Cathy Cropley, the Seattle nurse who wove nurses into the fabric of neonatal resuscitation as team members and instructors, insisting that skill take precedence over title. This collection of 26 key columns was compiled and edited by NeoReviews Editor-in-Chief Alistair G.S. Philip, MD, FRCPE, FAAP, in honor of the 15th anniversary of "NeoReviews," the American Academy of Pediatrics online journal of neonatology, available at http://www.neoreviews.org. *From playground to classroom, at home and across town, environmental hazards are all around us -- an unfortunate fact of modern life. And no one is more vulnerable to the adverse health effects these hazards can cause than our children. It's no wonder that environmental hazards are among parents' top health concerns for their children. Yet little time is spent training physicians and other caregivers to recognize, prevent, assess and treat chemical hazards and environmental causes of illness. This comprehensive guide puts critical children's health information and answers to parents' questions at your fingertips. From asbestos to radiation, ultraviolet rays, pesticides, asthma, lead, tobacco, childcare and school environments -- plus new chapters on global climate change, plasticizers, developmental disabilities, environmental disasters, and more -- current information on an exhaustive range of environmental health issues is included. The 3rd edition features 59 topic-based chapters including the addition of 18 new chapters.

Product 15-1009

Stay up-to-date on the latest advances and current issues in equine medicine with this handy reference for the busy equine practitioner, large animal veterinarian, or student. This edition of Current Therapy in Equine Medicine brings you thorough coverage and expert advice on selected topics in areas that have seen significant advances in the last 4 to 5 years. Each system chapter emphasizes the practical aspects of diagnosis and treatment and provides details for therapeutic regimens. Arranged primarily by body system, the text also features sections on infectious diseases, foal diseases, nutrition, and toxicology. With this cutting-edge information all in one reliable source, you'll increase your awareness of key therapies in less time. Focuses on the latest therapy for equine diseases, emphasizing detailed discussions and the most reliable and current information. Organized approach to important problems brings you up-to-date, practical information organized by organ system. Concise, easy-to-read format saves you time; most articles provide essential information in 2 to 5 pages. Renowned group of contributors share their expertise on the timely topics you need to know about. Photos enhance information. Line drawings illustrate important concepts. NEW! Emerging topics include issues such as disinfection in equine hospitals; complimentary modalities to traditional medicine; chemotherapy for oncological diseases; and protecting yourself with medical records. Each section has NEW topics including medical management of critically ill foals in the field; oral cavity masses; radiology of sinuses and teeth; biochemical tests for myocardial injury; protozoal myeloencephalitis update; management of bladder uroliths; skin grafting; managing the high-risk pregnancy; shock wave therapy; and more!
The STABLE Program is a neonatal education program that focuses on the post-resuscitation/pre-transport stabilization care of sick newborns. This learner manual serves as a student handbook for either self-study or instructor-led presentations. It includes more than 220 pages, illustrated in full color.

The field’s most trusted and comprehensive guide to treating common and rare problems in newborns "A copy of this reference should be kept readily available in the newborn unit. It is a potent learning tool for NCU students.” — Family Medicine review of an earlier edition A true essential for nearly three decades, this streamlined reference provides logically organized, quickly retrievable information on basic and advanced management techniques for the neonate. Featuring a convenient outline approach that puts key information at reader's fingertips, this quick reference covers everything clinicians need to know about on-call neonatal problems, procedures, diseases and disorders, and pharmacology. •The most comprehensive drug formulary available in a neonatal handbook •20 procedures are explained in a step-by-step manner •Full-color images of neonatal rashes and dermatologic problems •Immunization tables •An "On Call" section presenting more than common and serious patient management issues with guidelines for rapid diagnosis and treatment •Cutting-edge strategies for management of specific respiratory syndromes •Valuable appendices, including Abbreviations Used in Neonatology, Blood Pressure Determinations, Isolation Guidelines, and more

The gold-standard guide from the AAP and ACOG -- newly updated and more valuable than ever! Significantly revised and updated, the new 8th edition of this best-selling manual provides the latest recommendations on quality care of pregnant women, their fetuses, and their newborn infants. Jointly developed by the American Academy of Pediatrics (AAP) and American College of Obstetricians and Gynecologists (ACOG), this unique resource addresses the full spectrum of perinatal medicine from both the obstetric and pediatric standpoints. New in the 8th edition: New section on suggested levels of maternal care from birth centers to Level IV institutions New sections on screening for preterm delivery risk added to chapter on antepartum care New topics covered include the timing of cord clamping, the need (or not) for bedrest, and updates in hypertension Guidance regarding postpartum contraception recommendations has been expanded New section on mosquito-borne illnesses (including Zika) New section on infections with high-risk infection control issues Updated recommendations on neonatal resuscitation, screening and management of hyperbilirubinemia, and neonatal drug withdrawal.

The Comprehensive Textbook of Healthcare Simulation is a cohesive, single-source reference on all aspects of simulation in medical education and evaluation. It covers the use of simulation in training in each specialty and is aimed at healthcare educators and administrators who are developing their own simulation centers or programs and professional organizations looking to incorporate the technology into their credentialing process. For those already involved in simulation, the book will serve as a state-of-the-art reference that helps them increase their knowledge base, expand their simulation program’s capabilities, and attract new, additional target learners. Features: • Written and edited by pioneers and experts in healthcare simulation • Personal memoirs from simulation pioneers • Each medical specialty covered • Guidance on teaching in the simulated environment • Up-to-date information on current techniques and technologies • Tips from "insiders" on funding, development, accreditation, and marketing of simulation centers • Floor plans of simulation centers from across the United States • Comprehensive glossary of terminology
